## TECH STACK

Worked thoroughly with both, **Web3 Dapps** and **Web2.0 web apps**

- **NextJS**
- **React** (Javascript/Typescript)
- **Ethers.js & Web3.js**
- **web3Modal, web3-React** (Crypto wallet integration libraries)
- **AWS**
  - Amplify, DynamoDB, AppSync, Cognito, S3, Cloudfront
- **GraphQL, TheGraph** queries and integration through Apollo-Client and URQL
- Worked and familiar with NestJS
- **HTML, CSS, SASS**

### My strong Suite

- Can make amazing custom frontend responsive designs and components with custom css animations/effects,

## WORK EXPERIENCE

### Stixor

2021-Present

- **Frontend Developer**
  - Developing Dapps and web apps from scratch with Crypto Wallet integrations, backend integrations and smart contract calls along-with backend integration (ReactJS, NextJS, React Native)
  - Making pixel perfect and responsive frontend designs and components using custom CSS and plug and play components with personalised CSS overrides
  - Frontend deployment on AWS amplify
- **Fullstack Developer**
  - Frontend Development with the added responsibilities of development in different areas of the project
  - Written smart contract tests in Solidity. Familiar with editing smart contracts and running contracts locally for EVM time-travelling for testing with the application
  - Work with DynamoDB, MongoDB, PostgreSQL and NestJS. Handled backend functions and schema in accordance to needs

## Freelancing/Consultancy

- **AUQTA**
  - Developed a fully functional Real Estate Portal aiming at visualising properties even before they're made through Virtual Reality. Website live at <https://www.auqta.com>
  - Maintenance and Consultancy for further developments
